

What went well this sprint?

- Completed tasks
- Finished said tasks on time
- Whenever help was necessary, communication and help was easy to come by from other team members
- We had a successful demo for our TA

Actions to continue doing:

- Keep up good communications
 - Comfortable enough with each other to ask programming questions
 - The activity on slack
- Continue to maintain trello...(could do better though)
- Had enough meetings, but not too many
- Scheduled really well to ensure everyone was able to attend meetings

Actions to start doing:

- Set goals higher...
- Understand that interfacing is a big job
- Be happy to pass off tasks if too busy
- Set goals more evenly
- Constantly reassess goals during sprint
- Move meeting times to later time
- Utilize github more
- Get agile docs into github

Actions to stop doing:

- Being late/missing meetings
